

Abderrahman Lahiaouni

SUMMARY

“Research and development engineer, graduated from an engineering school, experience extends from IT consulting to research, relevant technical skills as well as communication skills acquired from working and traveling to different countries. Fast learner, excited to see new things, with a strong sense of commitment, fellowship and cheerfulness”

WORK EXPERIENCE

semvox gmbh – Kirkel, Germany
Senior DevOps engineer

OCT 2023 – FEB 2024 (FT)

As part of the DevOps team, I was involved in extending an internal tool that provides SBOM reports to customers from the source code, to do the same for images using a new api, taking on diverse responsibilities such as working with the api maker to respond to our use case, and coordinating with our cyber security expert for validation.

Consistec engineering – Saarbruecken, Germany
Senior software engineer

MAR 2020 – JUNE 2023 (FT)

Worked on transforming a legacy infrastructure to enable fast development, testing and deployment through tools such as Ansible and Docker. In addition to working on developing and maintaining a monitoring CLI python tool for customer servers running our product, and making up-to-date documentation for existing rest-apis using OpenAPI.

INRIA– Lille, France
Research and development engineer – Spirals

DEC 2018 – DEC 2019 (FT)

The project aimed to make CPU and time consuming SAT jobs, deployable remotely on a grid. Docker Machine, Ansible and Kubernetes were used for the reservation, configuration, deployment, and orchestration, through a Go api, running behind a reverse proxy, and a VPN using Docker Compose. The service was made it usable through adapting existing JavaFx GUI.

INRIA – Lille, France
Intern for Graduation Project – Spirals

MAY 2018 – NOV 2018 (FT)

As part of the spirals team, –particularly interested in introducing more automation in the adaptation mechanisms of software systems– I worked on a project focused on cloud storage, more specifically on load balancing and data replication aspects. The emphasis was on practical outcomes concerning data popularity, network traffic and available resources

Algo Consulting group – Rabat, Morocco
Summer internship

JUL 2017 – SEP 2017 (FT)

First experience in a professional environment. I worked on a customer survey mobile application. Been given 3 days to acquire basics of .NET, Xamarin.Forms and make a prototype of one of the views in the app, becoming part of the production team. Tasks involved writing logic and UI using C# and XAML (Mystery Shopper)

EDUCATION

2013 – 2018 **Engineer degree**
Software Engineering
National School of Applied Sciences

2012 **baccalaureate**
Department of Math
Rahaly El Farouq High school

TECHNICAL SKILLS

FRAMEWORKS	Spring boot, React.js, bootstrap
DEVOPS	Docker, Kubernetes, Ansible maven, jenkins, gradle git, github, gitlab-ci, Azure Devops
LANGUAGES	Java, Sql, c/c++ Python, c# html5, css, PHP, JavaScript
OS	Debian, CentOS, Arch Windows, OS X
DB	PostgreSQL, Oracle, Mysql
CERTIFICATIONS	Test driven development using python, pytest, and mock

COMMUNICATION SKILLS

TALKS	More Intelligent Web 3.0 Microservices and OOP principles
WORKSHOPS	.Net intro The Blockchain
LANGUAGES	Arabic French English

PERSONAL ATTRIBUTES

Goal Oriented

I believe in action over long-winded discussions, listen to everyone's viewpoints then draw a judgment based on reached consensus to immediately act and achieve goals quickly and efficiently.

Passionate

I have been interested in computer sciences from an early age. Academic and professional experiences have cemented this interest into a passion. I greatly enjoy carrying out fundamental and technical aspects in IT with practical and useful applications.
